SmartSurvey – Surveys & Inspections Without the Paper!

If you use paper-based forms for surveys, inspections and interviews then you'll probably have staff filling out the forms and more staff typing the results into a spreadsheet or database, from where you can finally get at the data, for analysis, reports or transfer on to another system. It's well known that a reliance on paper means this approach is labour-intensive, slow, tedious and inaccurate. Statistically 2% of paper is badly damaged or lost!

SmartSurvey solves these problems simply, by using No Paper! All your inspection and surveys catered for but recorded using our leading mobile data collection software on rugged touch-screen handhelds, PDAs or even on mobile phones.

You design your surveys on your PC, test them locally and then, when you're happy with them, try them on a handheld. Rolling out new surveys or modifications to those already in use, is also very simple. Select the users you wish to have the new survey(s) and distribute them via Wi-Fi, 3G or GPRS. In no time at all, your users have access to all the latest surveys! It's that simple

Data is then captured using our clear to see and simple to use touch screen interface. No fiddly buttons and no tiny dropdown lists. Completed surveys are sent back as soon as they are finished, so your data is ready and available in no time. We've found the perfect combination of a feature-rich product that is still very easy to use. It doesn't get any better or easier!

Just think!

- Total control over your data capture activities
- No programming skills required
- Cost effective data capture that can be used again and again for a variety of applications
- Open the package, install the software, plug in your hardware and build surveys straight away
- From simple surveys to comprehensive conditional surveys, ready in minutes
- Test your newly created surveys on your PC before downloading to the handheld
- Retrieve completed surveys as they are finished
- View your data in CreateIT or send it on to your favourite PC package
- No protracted specification or development cycles – so you realise your cost and time savings immediately

Whether your surveys are for Asset Management, Public Transport, Face to Face Interviews, Building Inspections, Quality Control, Production Monitoring or anything else, SmartSurvey can cope. Our client testimonials say it all and now we've made it even easier to get started with an entry level product for just £150!

Something for Everyone:

SmartSurvey Standard... Entry level mobile surveys that will get you started and cost you very little

SmartSurvey Plus... For more demanding surveys with extra question types to suit

SmartSurvey Deluxe... Everything you could need for any survey or inspection and more

SmartSurvey Deluxe PT...All of the above plus some specials for the PTEs and Transport Departments

See our SmartSurvey Product Range Datasheet to find the product for your survey needs or contact us to discuss your requirement on 01952 259520. Alternatively click on www.ikimobile.co.uk or email us at info@ikimobile.co.uk
